What's New in the Speedy Organizer?

Within the program you can share files and folders in 3 categories: 1. Business Document Management - all the commonly used business documents such as letters, bills, invoices, cheques,

etc 2. Payroll - all documents related to payrolls, payments and wages 3. Work-related - all other kinds of documents. In addition to these categories, you can use filters to narrow down your search results. Once the filter is applied, you can select the files and folders that you are interested in, which will be automatically moved to the correct folder. If you have any problem or question, please feel free to contact the helpdesk and we will get back to you as soon as possible. Don't forget to check out our website where you will find more information about our software and the latest versions: Contact Us The best way to get in touch is via our email support system, or you can directly reach our team by calling us at +44 (0)845 987 1480 (we are available Monday to Friday from 9am to 5pm), or by visiting our helpdesk: You can also visit our social media pages: What's New in Speedy Organizer 5.3 We are always adding new features and we have some great upgrades in this release. *Imports scanned files to the system (you can add these files directly to the system). *Adds support to Microsoft Word documents *Adds a new setting in the folder preferences: You can now choose between two sorting algorithms (manual and automatic) when moving folders into their correct folders. The manual option allows you to specify the file and folder names for each file. The automatic option uses the folder hierarchy. *New option: You can now select a storage location for the "scan folder" when importing scanned documents. *Adds new options in the folder preferences: You can now choose a color for "Scan Folder". You can now define how many scan pages to scan (default: 1 page). You can now change the default date format for imported files. *Removes the useless "Save window" option in the "Save folder" section in the file menu. *Corrects a bug in the scanning of TIFF images. *Adds

System Requirements:

Amazon Fire TV Download Fire OS version 4.0.3 (2017.2.0) or later or later Download the latest version of Amazon Video App Amazon Fire HD TV Amazon Fire Stick Remote Controls Download Fire
